Got it — now I clearly see the gap. You're not asking for a small fix…

👉 You want **Discover = premium app experience (like Home Workout app)**
NOT the basic card list Replit is generating.

🔥 **DEEP ANALYSIS (VERY IMPORTANT)**

✅ **What YOU want (Images 1–8)**

Your reference design has:

🧱 **STRUCTURED SECTIONS (VERY KEY)**

- Hero Banner (big image + text)
- Picks for you
- For beginners (horizontal scroll cards)
- Fast workout (list style)
- Challenge (image cards)
- With equipment (banner CTA)
- Stretch section
- Body Focus grid

👉 This is **CONTENT-DRIVEN DISCOVER UI**

❌ **What Replit gave (last 4 images)**

- Random cards ❌
- No structure ❌
- No sections ❌
- No hierarchy ❌
- Feels like dummy list ❌

👉 That's why it feels "shit" (you're right)

🧠 **ROOT PROBLEM**

Replit is building:

map(workouts) → render cards

But you NEED:

Curated Sections → UX-first layout → categorized rendering

🚀 FINAL REPLIT AI PROMPT (HIGH QUALITY DISCOVER)

Use this EXACT prompt 👇

📄 PROMPT

Act as a senior mobile app UI/UX engineer.

Redesign the Discover screen to match a PREMIUM fitness app experience like “Home Workout App”.

CURRENT PROBLEM:

The current Discover screen is just a list of workout cards.

- No structure
- No sections
- No hierarchy
- Feels basic and not like a real app

GOAL:

Build a HIGH-QUALITY Discover screen with MULTIPLE SECTIONS and MODERN UI.

STRUCTURE REQUIRED:

---

1. HERO BANNER (TOP)

- Large image background
- Title (e.g. "Only 4 Moves for Abs")
- Subtitle
- Rounded corners
- Overlay gradient

---

2. PICKS FOR YOU (VERTICAL LIST)

- Image (left)
- Title
- Duration + Level
- Clean row UI

---

3. FOR BEGINNERS (HORIZONTAL SCROLL)

- Card style

- Image background
- Text overlay
- Rounded cards
- Scrollable

---

4. FAST WORKOUT (LIST STYLE)

- Small image left
- Title right
- Duration text

---

5. CHALLENGE SECTION

- Big image cards
- Bold titles
- Horizontal scroll

---

6. WITH EQUIPMENT (BANNER)

- Big promotional card
- CTA button "Let's Go"
- Gym image background

---

7. STRETCH SECTION

- Horizontal cards
- Clean UI

---

8. BODY FOCUS GRID

Grid layout (2x2):

- Chest
- Arms
- Legs
- Abs

Each card:

- Icon/image
- Dark gradient overlay
- Title

IMPORTANT FUNCTIONALITY:

Every card MUST be clickable.

On click:

→ Navigate to:

/workout/[id]

DATA STRUCTURE:

Use categorized data like:

```
const discoverSections = {
  hero: {...},
  picks: [...],
  beginners: [...],
  fast: [...],
  challenge: [...],
  equipment: {...},
  stretch: [...],
  bodyFocus: [...]
};
```

UI REQUIREMENTS:

- Smooth scrolling
- Rounded cards (16px+)
- Shadows
- Gradient overlays
- High-quality fitness images (NOT emojis)
- Proper spacing (padding/margin)

NAVIGATION:

All items must connect to:

→ workout detail page
→ start workout
→ session screen

DO NOT:

- Do NOT use simple flat list
- Do NOT repeat same card UI everywhere
- Do NOT use emojis as main visuals
- Do NOT make it look like demo UI

FINAL RESULT:

Discover screen should feel like:

🔥 Real production fitness app

🔥 Content-rich

🔥 Visually engaging

🔥 Fully clickable
